

Activity 1 output

```
class Student {  
    int id;  
    String n;  
  
    public Student(int id, String n) {  
        this.id = id;  
        this.n = n;  
    }  
}  
  
public class Main {  
    public static void main(String[] args) {  
        Student s1 = new Student(10, "Alice");  
        System.out.println(s1.id);  
        System.out.println(s1.n);  
    }  
}
```

OUTPUT:

```
10  
Alice
```
